cycling
& THE LAW
The State Government recognises cycling as a legitimate form of transport and an increasingly popular recreational activity. This is a guide to the laws that apply when cycling in South Australia. The South Australian Road Traffic Act defines bicycles as vehicles for use on the road and road-related areas, and regulates bicycle riders, the same as it does for drivers of motor vehicles and all road users.

It is essential that all bicycle riders understand and behave in accordance with the road rules for their own, and other road users’ safety. This guide is not intended to be used as a legal document and should be read in conjunction with The Driver’s Handbook.

Cycling offers a range of personal benefits such as improved health and fitness, lower cost travel and often in urban areas, shorter trip times. Cycling also reduces the environmental impacts of the transport system. Safer, greener and more active transport is good for everyone.

The Department of Planning, Transport and Infrastructure is committed to improving cycling safety and encouraging more people to ‘cycle instead’.
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

› you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future
› although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this
› you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding

RULES FOR ROADS

Bicycle helmets
Keeping to the left
Causing a hazard
‘No Bicycles’ signs
Hand signals
Riding and seating position
Carrying passengers
Riding without hands on the handlebars
Holding onto a moving vehicle
Leading an animal
Slip streaming / pacing
Speed limits
Bicycle lanes
Bicycle storage areas

Giving way to buses
Bus lanes
Roundabouts
Riding abreast
Passing (overtaking) vehicles on the left
Children’s crossings
Bicycle crossing lights
Hook turns
The South Australian Road Traffic Act and Regulations including the Australian Road Rules explain the basic minimum requirements of safety equipment for bicycle riders. This legislation can be accessed from www.dpti.sa.gov.au

A bicycle is legally classified as a road vehicle. Similarly to a car, the bicycle must be suitably constructed and equipped, as well as properly maintained so that it does not present any danger to the rider or other road users. Bicycles must meet mandatory Australian Design Standards before they can be offered for sale and any modifications completed after the original purchase need to be consistent with the relevant Australian Design Standards.

**DEFINITION OF A BICYCLE**

A bicycle is classified in the Australian Road Rules as being any two or more wheeled vehicle that is built to be propelled by human power through a belt, chain or gears (whether or not it has an auxiliary motor) and includes a pedicab, penny-farthing, tricycle and a Pedalec. The definition does not include a wheelchair, wheeled recreational device (such as a kick scooter, skateboard or roller blades etc), wheeled toy, or any vehicle
with an auxiliary motor capable of generating a power output over 200W (whether or not the motor is operating). There are two types of power-assisted bicycles that are legal to ride in South Australia. Here the bicycle’s attached motor may provide assistance but the pedals are the main source of propulsion. One type is a power assisted bicycle with up to 200 watts of power (the power is controlled by a throttle or accelerator). The other type is a power assisted bicycle (or pedal cycle) meeting European standard EN 15194 for a Pedalec. These pedal cycles have up to 250 watts of continuous power and the power is controlled by the rider using the pedals. A Pedalec must have a clear label certifying that it complies with EN 15194.

**BRAKES**

Every bicycle must have at least one effective brake. As a minimum, the bicycle is required to have an operational back pedal foot brake or a hand brake fitted to either the front or back wheel. The levers for hand brakes should be within easy reach.

**WARNING DEVICE**

Every bicycle must have within easy reach a functioning warning device, such as a bell or a horn.
RIDING AT NIGHT AND IN HAZARDOUS WEATHER

Riding when visibility is reduced such as at night or in hazardous weather conditions (heavy rain), you must have (either on you or on your bicycle):

› a flashing or steady white light that is clearly visible at least 200 metres from the front of the bicycle
› a flashing or steady red light that is clearly visible at least 200 metres from the rear of the bicycle
› a red rear reflector that is clearly visible for at least 50 metres from the rear of the bicycle when light is projected on to it by a vehicle’s headlight on low beam.

TRAILERS

You may want to use your bicycle to tow a trailer in order to carry a passenger or goods. When using a bicycle trailer you are able to carry a child under the age of 10. The trailer must be able to carry the passenger safely and they must wear an approved helmet.

There are a number of restrictions for trailers which need to be followed. The attachment device (coupling) used to join the trailer to your bicycle must:

› permit adequate left to right movement between bicycle and trailer
› be robust, preventing the bicycle and trailer from coming apart
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

› you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future

› although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this

› you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding

Rules for roads

› the law does not give anyone indisputable right of way, nor should you assume that another road user is going to give way

› some people will judge all bicycle riders by your actions. If you disregard the road rules, you can undermine the goodwill of other road users.

BICYCLE HELMETS

When riding, you must wear an approved bicycle helmet that is properly adjusted and securely fastened. An approved bicycle helmet must comply with Australian Standard AS/NZ2063 which will appear on the helmet, and shops must not sell or offer bicycle helmets for sale unless they meet this standard. This also applies to any passenger that you may have on your bicycle. Evidence indicates that a helmet can help to reduce the severity of head injuries in the event of a crash.

KEEPING TO THE LEFT

You must keep as close as reasonably practicable to the left side of the road except:

› when making, or about to make, a right turn

› where the road is divided into lanes

› when overtaking.

› have a safety connection such as a chain, that:
  - will hold the trailer in the event that the coupling comes apart
  - will not easily or accidentally come apart itself, and
  - permits normal movement without more slack than necessary for that purpose.

You must not tow:

› a bicycle trailer carrying a person unless you are 16 years old or older

› a bicycle trailer with a passenger 10 years or older

› more than one bicycle trailer at a time

› any equipment or load on the trailer exceeding 850 millimetres in width.

A trailer must be fitted with two reflectors, which must be between 330 millimetres and 1000 millimetres from the ground. They must be fitted to the rear, evenly spaced either side of the trailer and on the same level.

If travelling between sunset and sunrise, or in hazardous weather conditions, either one or two red lights must also be fitted to the rear of the trailer. If one light is fitted, it must be placed at the right hand side of the centre of the trailer. If two lights are fitted, they must be evenly spaced either side of the centre of the trailer at the same level. In either case, the light(s) must be between 330 millimetres and 1000 millimetres from the ground.
BICYCLE RACKS ON VEHICLES
A bicycle rack attached to a motor vehicle, and any bicycle on the rack, must not obscure the rear number plate of the vehicle.

When attaching a bicycle rack to the rear of a vehicle, you can either:
› display a bicycle rack number plate on the rack, or
› take the rear number plate off the motor vehicle and attach it to the bicycle rack.

You must not display a standard number plate on both the rear of a motor vehicle and on a bicycle rack or display homemade number plates.

Bicycle rack number plates have the same registration number as your motor vehicle and cannot be used on any other vehicle. Between sunset and sunrise or during periods of poor visibility, the number plate on the rack must be illuminated with a white light, making the number clearly visible from a distance of 20 metres. This light must not project light to the rear of the vehicle, other than reflected light.

When carrying bicycles on your rack, you must attached an additional brake light if the brake lights on the motor vehicle are not visible from a distance of 200 metres (under normal weather conditions).
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

› you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future
› although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this
› you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding

rules for roads

› the law does not give anyone indisputable right of way, nor should you assume that another road user is going to give way
› some people will judge all bicycle riders by your actions. If you disregard the road rules, you can undermine the goodwill of other road users.

BICYCLE HELMETS

When riding, you must wear an approved bicycle helmet that is properly adjusted and securely fastened. An approved bicycle helmet must comply with Australian Standard AS/NZ2063 which will appear on the helmet, and shops must not sell or offer bicycle helmets for sale unless they meet this standard. This also applies to any passenger that you may have on your bicycle. Evidence indicates that a helmet can help to reduce the severity of head injuries in the event of a crash.

KEEPING TO THE LEFT

You must keep as close as reasonably practicable to the left side of the road except:

› when making, or about to make, a right turn
› where the road is divided into lanes
› when overtaking.

Bicycle rack number plates can be purchased at your nearest Service SA Centre or online at www.ezyplates.sa.gov.au

Bicycle rack number plate

CHILD CARRIER SEATS

When carrying children in bicycle carrier seats, they must wear approved bicycle helmets and be safely restrained. The carrier seat or trailer must be a sufficient distance from the bicycle wheels to ensure the child can not put fingers, toes or toys into the moving bicycle wheel.
The *South Australian Road Traffic Act* including the *Australian Road Rules* define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

- You can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver's licence if you hold one. If you do not hold a driver's licence you will still incur demerit points which can prohibit you from obtaining a licence in the future.

- Although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this.

- You are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding.
The law does not give anyone indisputable right of way, nor should you assume that another road user is going to give way.

Some people will judge all bicycle riders by your actions. If you disregard the road rules, you can undermine the goodwill of other road users.

BICYCLE HELMETS
When riding, you must wear an approved bicycle helmet that is properly adjusted and securely fastened. An approved bicycle helmet must comply with Australian Standard AS/NZ2063 which will appear on the helmet, and shops must not sell or offer bicycle helmets for sale unless they meet this standard. This also applies to any passenger that you may have on your bicycle.

KEEPING TO THE LEFT
You must keep as close as reasonably practicable to the left side of the road except:

- when making, or about to make, a right turn
- where the road is divided into lanes
- when overtaking.
In deciding how close to the left side of the road or path is ‘reasonably practicable’, you should take into account factors such as obstacles in your path, lighting conditions at the time, and the quality of the riding surface.

A driver must provide a minimum of 1 metre of space when passing a cyclist on roads 60 km/h and under and 1.5 metres on roads over 60 km/h. Motor vehicles are allowed to cross centre dividing lines and straddle lanes in order to safely pass cyclists at the minimum distance only if the driver has a clear view of any approaching traffic and it is safe to do so.

**CAUSING A HAZARD**
You must not cause a traffic hazard (cause danger to yourself or others) by riding into the path of a driver or pedestrian.

For example, if you move out to pass a parked car or avoid an obstacle without checking behind for other road vehicles, you can cause danger to yourself or others. You should only move out to pass a parked car or avoid an obstacle when it is safe to do so.

**‘NO BICYCLES’ SIGNS**
You must not ride on a length of road or path to which a Road Access sign or a No Bicycles sign applies (see diagrams). These signs also apply to all riders.
including those under 12 years old and riders with a disability (see Footpaths, p. 22).

HAND SIGNALS
You must give a hand signal when preparing to turn right, diverge right or when changing lanes to the right. However, when undertaking a hook turn, you do not need to give a hand signal (see Hook turns, p. 20).

RIDING AND SEATING POSITION
When riding, you must face forward and be in a seat designed for travelling on a bicycle. You must not ride the bicycle seated in any other position, e.g. on the handlebars or the crossbar.

CARRYING PASSENGERS
You must not carry more passengers than the bicycle is designed or equipped to carry. Most bicycles are designed to carry only the rider, however there are exceptions including child carrier seats, tandems and bicycle trailers. Extra persons are not to be carried unless they are in a seat designed for a passenger.

RIDING WITHOUT HANDS ON THE HANDLEBARS
You must always have at least one hand on the handlebars and have proper control of the bicycle.
HOLDING ONTO A MOVING VEHICLE
You must not be towed or hold on to a moving vehicle, including another bicycle rider.

LEADING AN ANIMAL
You must not lead (on a leash or any other leading device) an animal from a vehicle, including a bicycle.

SLIP STREAMING OR PACING
You must not ride within two metres of the back of a moving motor vehicle for more than 200 metres.

SPEED LIMITS
Bicycle riders must obey the same speed limits as drivers of motor vehicles.

BICYCLE LANES
Bicycle lanes are for the exclusive use of bicycle riders. These lanes are indicated by bicycle lane signs or by road markings comprising both a white bicycle symbol and the word ‘lane’ painted in white. The lanes operate during the times indicated. If no times are stated, they operate at all times (see diagrams on the opposite page).

Green bicycle lanes are installed at intersections where there is a higher potential for conflict between motor vehicles and bicycles. They clearly highlight the boundaries of a bicycle lane.
If you are riding on a road with a bicycle lane, you must, if practicable, ride in the bicycle lane. You may move out of the bicycle lane to avoid debris, potholes, or to safely overtake another bicycle rider. You must only ride in the correct direction in the bicycle lane.

During the bicycle lane operating times, you must not ride outside a bicycle lane abreast of another rider unless you are overtaking.

Other road users are permitted to use a bicycle lane only when:

- the bicycle lane is not in operation
- stopping in an emergency
- entering or leaving the road from private property, a parking area, including a parking lane, or another road (and then only for up to 50 metres)
- overtaking a vehicle turning right or making a U-turn (and then only for up to 50 metres)
- avoiding an obstruction (and then only for up to 50 metres)
- driving a bus or taxi picking up or dropping off passengers (and then only for up to 50 metres).

\textit{Bicycle Lane operates at all times sign} \quad \textit{Bicycle Lane operates at times stated sign}
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

- you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future.
- although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this.
- you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding.

RULES FOR ROADS

BICYCLE HELMETS
When riding, you must wear an approved bicycle helmet that is properly adjusted and securely fastened. An approved bicycle helmet must comply with Australian Standard AS/NZ2063 which will appear on the helmet, and shops must not sell or offer bicycle helmets for sale unless they meet this standard. This also applies to any passenger that you may have on your bicycle. Evidence indicates that a helmet can help to reduce the severity of head injuries in the event of a crash.

KEEPING TO THE LEFT
You must keep as close as reasonably practicable to the left side of the road except:

- when making, or about to make, a right turn
- where the road is divided into lanes
- when overtaking.

BICYCLE STORAGE AREAS (BIKE BOXES)
A bicycle storage area, or bike box, is a safety feature at an intersection to allow bicycle riders to be more visible to drivers. It is represented on the road with a white bicycle symbol, and the area may be painted green.
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

› you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future

› although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this

› you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding

rules for roads

› the law does not give anyone indisputable right of way, nor should you assume that another road user is going to give way

› some people will judge all bicycle riders by your actions. If you disregard the road rules, you can undermine the goodwill of other road users.

BICYCLE HELMETS

When riding, you must wear an approved bicycle helmet that is properly adjusted and securely fastened. An approved bicycle helmet must comply with Australian Standard AS/NZ2063 which will appear on the helmet, and shops must not sell or offer bicycle helmets for sale unless they meet this standard. This also applies to any passenger that you may have on your bicycle. Evidence indicates that a helmet can help to reduce the severity of head injuries in the event of a crash.

KEEPING TO THE LEFT

You must keep as close as reasonably practicable to the left side of the road except:

› when making, or about to make, a right turn

› where the road is divided into lanes

› when overtaking.

Using a bicycle storage area:

› at a red traffic signal, bicycle riders wanting to turn left or go straight must keep to the left of the bike box.

› bicycle riders wanting to turn right must keep to the right of the bike box.

When entering a bicycle storage area, a bicycle rider must give way:

› to any vehicle that is in the area

› if the area is before any green or yellow traffic lights, any vehicle that is entering or about to enter the area, unless the motor vehicle is turning in a direction that is subject to a red traffic arrow

› if the area forms part of a lane to which traffic arrows apply, any vehicle that is entering or about to enter the area at a time when those arrows are green or yellow.

GIVING WAY TO BUSES

All vehicles in the left lane (including a bicycle lane) must give way to any bus displaying a Give Way to Buses sign and is indicating its intention to rejoin the traffic flow.
**BUS LANES**

You are permitted to ride in bus lanes; however you should not obstruct a bus using the lane and ride as close as reasonably practicable to the left side.

*Bus Lane operates at all times sign*  
*Bus Lane operates at stated times sign*

You are not permitted to ride in a Bus Only Lane. These lanes are usually coloured red and in South Australia most have a bicycle lane adjacent for bicycle riders to ride in.

When there is a separate signal for buses (a white ‘B’ light) at an intersection, you must allow the bus to proceed on that signal. It is illegal for any other vehicle, including a bicycle, to proceed on the white ‘B’ signal.
ROUNDABOUTS

Like all motorists entering a roundabout, bicycle riders must give way to vehicles already on the roundabout and should look out for vehicles approaching the roundabout from the right. You may turn right from either lane of a multi-lane roundabout. If you are riding in the left lane, you must give way to any vehicle leaving the roundabout.

Bicycle rider giving way to vehicles leaving the roundabout
RIDING ABREAST
You may ride beside another bicycle rider on a road but must not ride more than 1.5 metres apart. Three or more bicycle riders must not ride beside each other, although you are permitted to overtake other bicycle riders that are riding beside each other. You must not ride outside a bicycle lane abreast of another rider in a bicycle lane unless you are overtaking (see Bicycle Lanes, p. 12-13).

PASSING (OVERTAKING) VEHICLES ON THE LEFT
Whether you are riding in a marked bicycle lane or sharing a lane with a vehicle, a bicycle rider must not pass or overtake on the left of any vehicle that is giving a left change of direction signal and is turning left. A bicycle rider may pass or overtake a vehicle on the left when the vehicle is giving a left change of direction signal and is stationary or moving forward to turn left. Once the vehicle begins turning left the rider must not ride past or overtake the vehicle on the left.

A driver turning left through a break in a dividing strip must give way to any cyclist travelling in the bicycle lane. A dividing strip is a painted area or a raised structure, located between intersections, separating the bicycle lane from a marked lane. Drivers must not overtake a cyclist and then turn left in front of the cyclist’s path without due care and consideration to the movement and safety of the cyclist.
PEDESTRIAN AND CHILDREN’S CROSSINGS
There are special rules that apply at children’s crossings (i.e. crossings with red and white posts and orange flags or flashing lights). All road users (including bicycle riders) must give way to pedestrians on children’s crossings. You must not overtake another vehicle that has stopped at a crossing to give way to pedestrians, either to the right or left of that vehicle. You must remain stationary if any pedestrian is on or entering the crossing.

You must not ride across a pedestrian crossing to cross the road from one side to the other. You must walk with your bicycle across the road. This rule does not apply to those bicycle riders who have an exemption to ride across pedestrian crossings, provided they carry a letter issued by their doctor (see Exemption to Ride Across Pedestrian Crossings, p. 22).

BICYCLE CROSSING LIGHTS
Bicycle crossings have been installed to assist bicycle riders to cross busy roads – the same way in which pedestrian lights assist pedestrians. If you are approaching or at bicycle crossing lights, you must obey the lights and only proceed when the traffic or bicycle light is green. Unlike a pedestrian or children’s crossing, you can ride across a bicycle crossing.
HOOK TURNS
When turning right at an intersection, you have the option of making a hook turn (from the left lane), rather than making a normal right turn. A hook turn may be more convenient on some roads, such as those with heavy traffic. When making a hook turn, you must obey all traffic laws such as only proceeding on a green light and giving way to other traffic.

When making a hook turn you must complete the following steps (see diagram below):
1. Approach and enter the intersection from the left side.
2. Move forward and wait on the opposite left corner.
3. Then proceed onto the road to which the right turn was to be made.

How to make a hook turn
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

› you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future
› although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this
› you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding.

rules for paths

This section explains the different types of ‘off-road’ paths available to bicycle riders and some associated rules bicycle riders must follow when using them.

When riding on any path you must:

› exercise due care and consideration for pedestrians and other users
› give warning to pedestrians or other path users by sounding your bell or horn or by other means, if necessary for the purpose of averting danger
› keep to the left of any oncoming bicycle rider
› wear an approved bicycle helmet that is properly secured and fastened.

Specifically when using footpaths or shared paths you must:

› keep to the left of the path unless it is impracticable to do so
› give way to any pedestrians.
FOOTPATHS
Cyclists of all ages are permitted to ride on the footpath unless a ‘no bicycles’ sign is present (see No Bicycles signs, p. 11).

EXEMPTION TO RIDE ACROSS PEDESTRIAN CROSSINGS
If you have a disability or medical condition, you may be permitted to ride your bicycle across pedestrian crossings if you obtain a letter from your doctor. You must be named in the letter and it would need to say that you are permitted to ride across pedestrian crossings due to your disability or other medical condition. The letter must be carried whilst riding and it can be valid indefinitely or for a period specified by your doctor.

SHARED PATHS
There are an increasing number of paths that can be used by bicycle riders. In most cases, these are shared paths with pedestrians. These paths are identified by signs.

Shared path sign
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

› you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future
› although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this
› you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding

The law does not give anyone indisputable right of way, nor should you assume that another road user is going to give way. Some people will judge all bicycle riders by your actions. If you disregard the road rules, you can undermine the goodwill of other road users.

**BICYCLE HELMETS**

When riding, you must wear an approved bicycle helmet that is properly adjusted and securely fastened. An approved bicycle helmet must comply with Australian Standard AS/NZ2063 which will appear on the helmet, and shops must not sell or offer bicycle helmets for sale unless they meet this standard. This also applies to any passenger that you may have on your bicycle. Evidence indicates that a helmet can help to reduce the severity of head injuries in the event of a crash.

**KEEPING TO THE LEFT**

You must keep as close as reasonably practicable to the left side of the road except:

› when making, or about to make, a right turn
› where the road is divided into lanes
› when overtaking.

**SEPARATED PATHS**

A separated path is divided into sections, one of which is designated for the exclusive use of bicycle riders and the other for pedestrians. These paths are identified by signs and path markings and you must not ride along the part of the path designated for pedestrians.

**BICYCLE PATHS**

A bicycle path is for the exclusive use of bicycle riders and is identified by signs and path markings.

**PARKS AND PRIVATE PROPERTY**

Some parks do not allow bicycle riding within their grounds. If you are unsure about bicycle access, you should contact the Department of Environment, Water and Natural Resources, or the appropriate local council or land owner for advice.
alcohol & other drugs

It is both dangerous and against the law to ride a bicycle or any other vehicle, ‘under the influence’ of alcohol or drugs. This is a criminal offence, and upon conviction you will be fined and will consequently have a criminal record. You may also lose up to six demerit points from your driver’s licence or learner’s permit, and potentially lose your licence. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future.

You can be fined or convicted for driving under the influence regardless of whether you are over or under the 0.05 blood alcohol concentration level. This is particularly the case if you are so affected by any amount of alcohol or a drug that you are incapable of exercising effective control of your bicycle.
if you have a crash

If you are involved in a crash, you must take the following actions:

› stop straight away and assist any injured people
› give your name and address and any other information necessary to identify the bicycle you were riding. If the bicycle is not yours you must provide the name and address of the bicycle owner to:
   - any other driver / rider in the crash
   - any injured person
   - the owner of any damaged property
   - any representative of these people
   - any attending police officer.

You must report the crash to Police if one or more of the following apply:

› any person is killed or injured
› for any reason, you do not give the required particulars to other people
› another driver’s or rider’s particulars are not given to you
› a fair estimate of the value of the total damage is more than $3000 (not required if the only property damage is yours alone)
a vehicle involved in the crash is towed or carried away by another vehicle.

When a person is killed or injured, reports to the Police must be made as soon as possible. In exceptional circumstances it is advisable to notify the police within 90 minutes.

It is also advisable that you record all the details of the crash, including:

- registration number, if a motor vehicle
- the name and address of the other driver / rider
- the name of the owner of the vehicle (if the person driving is not the owner)
- make, model and colour of the vehicle / bicycle
- all details of the crash, including names and addresses of any witnesses, description of the damage, road surface and weather conditions, positions and directions of vehicles before and after the collision

If you are able, take a photo of the scene.

For further clarification, you should contact a solicitor, the Legal Services Commission or a community legal centre.
bicycle security & insurance

If you are leaving your bicycle in a public area, try to leave it in a place that is easily visible, well lit, and where there will be people passing by. Always lock your bicycle to an immovable object with a good quality lock, even at home or when you are leaving it for only a short time.

Few stolen bicycles that are found are returned to their owners, mainly because owners are unable to give a description of the bicycle. Keep a description of your bicycle to increase your chances of getting your bicycle back if it is found. Take a photograph of your bicycle and keep a record of all relevant details such as the bicycle type, brand name, colour, size and serial number. You could identify your bike by engraving your (or a family member’s or a friend’s) drivers licence number for easy identification.

Some household insurance polices now have public and personal liability insurance which will cover you and your bicycle if it is stolen or if you injure someone else or damage someone else’s property. If you are in doubt you should refer
The South Australian Road Traffic Act including the Australian Road Rules define the rules and responsibilities of all road users, including bicycle riders. The following section outlines rules that apply specifically to bicycle riders and includes other relevant road rules.

Bicycles are classified as vehicles and therefore bicycle riders have the same responsibilities, and must obey the same rules, as motor vehicle drivers. Remember:

› you can be charged with a traffic offence in the same way as a motor vehicle driver. This includes incurring demerit points against your driver’s licence if you hold one. If you do not hold a driver’s licence you will still incur demerit points which can prohibit you from obtaining a licence in the future

› although the law gives you the same rights and responsibilities as other road users, other road users may not be aware of this

› you are more easily injured than motor vehicle occupants and it is therefore safer for you to be highly visible and look out for other road users when riding

rules for roads

› the law does not give anyone indisputable right of way, nor should you assume that another road user is going to give way

› some people will judge all bicycle riders by your actions. If you disregard the road rules, you can undermine the goodwill of other road users.

BICYCLE HELMETS

When riding, you must wear an approved bicycle helmet that is properly adjusted and securely fastened. An approved bicycle helmet must comply with Australian Standard AS/NZ2063 which will appear on the helmet, and shops must not sell or offer bicycle helmets for sale unless they meet this standard. This also applies to any passenger that you may have on your bicycle. Evidence indicates that a helmet can help to reduce the severity of head injuries in the event of a crash.

KEEPING TO THE LEFT

You must keep as close as reasonably practicable to the left side of the road except:

› when making, or about to make, a right turn

› where the road is divided into lanes

› when overtaking.

to your insurance policy or contact your insurance company. If you do not have any insurance you should take out separate public liability insurance against causing personal injury to another person to avoid any damages claim. A number of cycling organisations provide some form of public liability insurance and personal accident insurance. Contact your local bicycle club or association to find out more information.
